

Energy Level Extreme

the future of flight has wheels

In a world where super bikes are traditionally built on two wheels, the GG Taurus breaks through as a screaming leader of invention. With its unique three-wheeled design and powered by a 1300 cc BMW four-cylinder engine, the GG Taurus turns up the heat.

Loved by enthusiasts in Europe, the Swiss-born GG Taurus is built for speed and to look the part. Seductive style and extreme performance are the chief characteristics of this super bike. You're not likely to see this parked next to you at the mall; these are exclusive performance bikes designed to cater to a small, very specific audience.

Be a part of this history-making marvel that is built to jump start your heart!

The Swiss Movement

The GG Taurus is the brainchild of Swiss company Grüter and Gut Technik's proprietor and managing director, Walter Grüter and his design and engineering team. Having designed over eight unique superbikes, the development of GG Taurus is the natural progression of Walter's innovative ideas.

With the very finest technology, ergonomics and performance from the people who invented precision, the GG Taurus' style and design is like nothing that's come before. Handling is nimble and the bike will never feel out of place when pushed to its upper limits.

Luxury On Speed

The word precision should be the Swiss mantra, and no detail has been overlooked in the creation of the GG Taurus. All of this precision and raw power has led to one thing: performance. With numbers usually reserved for a high-performance sports car, the GG Taurus holds its own, both on the road and on the track. The GG Taurus is not just one bike, but the culmination of more than 30 years of performance and reliability.

Seductive Design

All of the power of the GG Taurus has been wrapped in a design like nothing else. Like all exotics, the GG Taurus is hand-built using the finest materials. Utilizing carbon fiber and high-strength fiberglass panels, the super bike will still look relevant 20 years from now.

Precision Engineering

Every component of the GG Taurus has been made to a precise standard, from the fully adjustable suspension to the solid one-piece aluminum swing-arm. Nothing has been overlooked.

Exhilarating Performance

The nearly 1300 cc engine would be all but useless without a closely synchronized six-speed race transmission to transfer the power to the 19 inch rear wheel. And in keeping with the attention to detail that has made the GG Taurus a leader in its class, an all-important reverse gear has been added.

Performance From Within

The GG Taurus is built around a BMW water-cooled, four-stroke, in-line four-cylinder engine with two overhead camshafts and four valves per cylinder. The engine's power is rated at an impressive 175 hp at 9,250 rpm and 104 ft lbs of torque at 8,250 rpm. Designed to propel you to a maximum speed of over 230 km/h (140mph).

Supreme Firepower

thrill seekers wanted. inquire within.

With plenty of power to spare, the GG Taurus is fitted with an extremely powerful four-cylinder water-cooled engine. The engine is perfectly positioned below the rider and lower than a traditional superbike to give it a perfect balance and a low center of gravity.

One ride on it will send adrenaline rushing through the veins and you'll be hooked. The 175 hp engine will rocket you up to a top speed of 230 km/h (140mph). You'll quickly find yourself running out of open road.

The front suspension rivals that of most sports cars and is made entirely out of aluminum, including the single side swing arm. Not to be outdone, the rear suspension is comprised of fully adjustable coil over shocks that can be adjusted to suit road conditions. The brakes consist of both 270mm twin floating front discs and a single 284mm rear disc. Then there are the wheels... Forged from a single piece of aluminum, the front wheels measure an impressive 17 inch diameter and a massive 19 inch, shaft-driven rear wheel that will help transition the power to the road.

GG Means Freedom

unleash your inhibitions

While the GG Taurus is built for speed and performance, it does not fall short on comfort. Its ergonomically built design provides that the rider is comfortably positioned. To further enhance the riding experience, GG's available options allow for a fully customizable bike, allowing you to choose the type of suspension, cargo-carrying options and electronic displays. Touring bike or sports super bike... You choose.

GG Is For The Elite

leave your tread marks...

The GG Taurus is being unleashed on the streets of the U.S. for the first time! With very limited production, only a select few will have the pride of owning this exclusive piece of Swiss machinery. Get on board and turn heads at every corner!

GG Options

- 1 Digital Dashboard
The digital dashboard with carbon fiber allows a special racing look of the GG Taurus, is waterproof and has a lot of special functions.
- 2 On Board Computer
The on-board computer is integrated into the original dashboard and allows you to have more information such as outside temperature, oil level warning and more.
- 3 GPS - BMW Bike Navigator 4 (incl. Adapter + Connection Cable)
This robust 4.3" widescreen navigator is built for high requirements and is ready for unforgettable tours on your GG Taurus.
- 4 Pannier left side and right side
This waterproof pannier with a capacity of 55 liters with space for one helmet and luggage is especially designed for GG Taurus.
- 5 Storage tank for gloves
The additional loading space of 15 liters in an optimal position allows you to have a camera or other small things within reaching distance.
- 6 Inner bags
Especially produced for GG Taurus, high-class quality of material.
- 7 Heated grips with 2 adjustable temperature levels
In cold weather the heated grips are very comfortable for the driver and will also increase safety.
- 8 Pillion grips with backrest
The milled pillion grips in aluminum with integrated back-rest are made for the security and the comfort of the pillion. The back-rest is removable in height and forward direction.
- 9 Anti-theft Alarm
The anti-theft alarm can monitor your GG Taurus all the time when it is not in use.
- 10 Indoor dust cover
The indoor dust cover is especially designed for the indoor protection of your GG Taurus.
- 11 Splash Guard
- 12 Shock absorber rear with WESA-X and E-PA

Modifications for the true enthusiast

- 1 Xenon low beam / Xenon high beam
The quality of light is much higher with the Xenon lamps than with conventional lamps, more comfort and more security are the result.
- 2 Day Light LED (not compatible with additional spot lamps)
LED lamps have faster start characteristics, longer economic life period and give you more security.
- 3 Additional spot lamps, maneuverable (not compatible with LED lamps)
The horizontal curved light will give you more security on roads with twists and turns.
- 4 Shock absorbers front wheels with additional reservoir
This option allows the adjustment of the pressure range in front and is equipped with integrated low and high speed compression damping.
- 5 Shock absorber rear wheel with remote reservoir
This option allows the adjustment of the pressure range of the rear wheel and is equipped with integrated low and high speed compression damping.
- 6 Shock absorber rear wheel
The hydraulic preload adjustment can be changed by hand. With this system you can adapt the suspension for additional weight.
- 7 Special SR exhaust system with titanium end cans
The matt looking end cans of your exhaust system in titanium are a nice alternative to the stainless steel version.
- 8 Shifter
Originally the shifter was designed for racing. It automatically upshifts the gear without the operation of the clutch.
- 9 Servo assisted power steering system
The EPS (Electric Power System) is very precise and always feels natural in use. The level of assistance is adjusted automatically according to speed and steering angle.
- 10 Special paint finish
Your GG Taurus can be personalized with a special paint-job or airbrushing for an additional price upon request.
- 11 Mechanically polished wheels with surface protection
The wheels are can be specially coated to protected against oxidation and corrosion.
- 12 Additional brake

It's ok to BraGG...

talk about it, be seen on it

Turn heads and blow minds with a ride that is in a class of its own! The enviable GG Taurus' heart-pounding driving experience will give you something to BraGG about!

To own a GG Taurus is to become part of the GG Taurus family of loyal and passionate riders. Become engaged in the GG Taurus lifestyle. Connect with us through our official social media accounts on Twitter and Facebook.

Once you are an official owner of the GG Taurus, you become part of our GG Taurus Owners Club with access to our exclusive GG Taurus owners interactive site.

Follow us on Facebook and Twitter and get closer to living the GG Taurus experience. Stay informed with the most up-to-date developments, images and exciting coming attractions with the exclusive GG Taurus!
